

Sponsorship Packet

You have the opportunity to sponsor the first pet friendly shelter in Philadelphia- which will save lives for pets and people.

THE PROBLEM:

- Approximately 250 people died in Philadelphia last year while experiencing homelessness.
- A portion of these people died from hypothermia.
- Of those who died from hypothermia, many were homeless with their pets.
- There are no shelters in Philadelphia that house people and their pets.
- Over the course of operating shelters in churches for 6 years, SREHUP (Student-Run Emergency Housing Unit of Philadelphia) has had to turn away countless individuals who are seeking shelter with their pets.

THE SOLUTION:

- SREHUP is opening the FIRST shelter for people and their pets in Philadelphia.
- We are partnering with local pet shelters, which are providing crates, dog supplies, dog food, veterinarian care, and dog groomers and walkers for our shelter. Morris Animal Refuge is our biggest pet care partner.
- This shelter will be innovative, revolutionary, and life saving.

WE HAVE A PROVEN TRACK RECORD OF SUCCESS:

- SREHUP is a shelter initiative that has successfully operated 3 homeless shelters in Philadelphia. We have over 7 years of experience doing this vital work. And we have helped move hundreds of our vulnerable neighbors from street to housing.
- We are different from most shelters because we are not a drop in shelter, and our guests aren't transient.
- The same guests stay with us all winter while we link them to social workers and services they need to get back on their feet.
- This is not a band-aid, it's real and lasting help that changes lives.

Please sponsor our building today, be a part of this groundbreaking project, and help us save the lives of our vulnerable neighbors and their pets.

Our Partners, Our Vision

A FUTURE WITHOUT HOMELESSNESS

Students are by nature innovative. And their creativity is in full use at SREHUP- especially with our partnerships and program offerings. SREHUP collaborations include (but are not limited to) R and B Farms INC, which is building our rooftop garden, installing solar panels, creating a plan for sustainability and green practices, and leading workshops, classes, and job training for the guests at our shelter. We are also partnering with Charge Performance and Wellness which offers regular free fitness training workouts and wellness education classes at our shelter. In addition to a garden and fitness classes, we have a variety of art programs, workshops, job training, and entrepreneurial programs. All designed to engage our guests in mind, body, and spirit.

SREHUP is not a Band-Aid. It's a holistic approach designed to get people back on their feet, while educating students on social justice. And we are more than a shelter. We are a movement. Please join us as we work for a more peaceful and just world.

Our Mission

The mission of the Student-Run Emergency Housing Unit of Philadelphia (SREHUP) is to achieve long-lasting positive changes for the community of people experiencing homelessness by providing for this population's immediate needs while empowering individuals to lift themselves out of homelessness and advocating for changes that will end homelessness.

Our Structure

SREHUP is a non-profit organization made up of several distinct college chapters in the greater Philadelphia region. SREHUP's work is organized by a board of student directors, consisting of the chapter presidents and student directors, each with distinct responsibilities crucial to the success of the organization's work.
